

RUBIE CHAIR

It was a quilted blanket slung casually over a wooden chair which gave the Berlin design duo Murken Hansen the inspiration for their Rubie model. One key design element are the elegant, flowing lines of the collection – there are no right angles – which give the model a contemporary look and finish it with finesse. The sophisticated interplay between its functional approach and its snug subtlety characterises all Rubie models, allowing them to integrate effortlessly into a variety of everyday situations. The original chair, lounge couch, armchair, and bar stool with low or full-height armrests are all available with wire, steel, or wooden frames and feel like a natural part of almost any imaginable interior environment.

MURKEN HANSEN

The Berlin-based studio of Hauke Murken (*1963) and Sven Hansen (*1969) was founded in 1999. The design duo already won several design awards for their designs – mostly with products for the kitchen and furniture industry. Their working principles are clarity and simplicity. As a source of inspiration the duo states „Idea Ping-Pong“ as well as intentionally working and thinking in the wrong direction.
